

# 10 REASONS TO CHOOSE OUR *timber doors*

## 1 ENGINEERED TIMBER

The use of multi-layer timber for doors is long established in Scandinavia and Northern Europe, but very rare in Britain. The multi-layer structure used as standard throughout our range is particularly effective at resisting warping and twisting, as the opposing grains even out moisture movement. It is the twisting of the timber during wet weather, more than the swelling itself, which causes standard wooden doors to stick.

## 2 INTEGRATED LOCKING

Each and every one of our doors feature full height, integrated locking systems with hook bolts and a deadlock. This lock can be controlled by one of our handles or our Townhouse option pictured right.

## 3 FACTORY FINISHED

All our doors are factory painted prior to assembly, providing complete protection from moisture absorption and maximising longevity. Paint finishes are guaranteed for 12 years and stained finishes for 6 (Excluding oak products)

## 4 COMPLETE RENEWAL

When we replace a door, we replace the full thing, that means you get a new bespoke frame, cill, threshold, double glazed units, and new locks and furniture. If your door has a fanlight or sidelights, these are replaced as part of the job. The door and frame are purpose designed to have a double rebate to provide further weather tightness. Replacing the frame allows us to set your new door up perfectly true and square in the opening.

## 5 TRULY BESPOKE

In every sense of the word. Choose the style, locking system, beading, ironmongery, glass style and of course the colours. We then make this door to the millimetre to fit your home.

## 6 INTERNAL BEADING

It doesn't sound too important, but beading panels and glass from the inside is hugely important. Firstly, the glass can't be removed from the outside which is great for security. Secondly, external beads are the first thing to allow water ingress into the frame and cause rot.

## 7 HARDWARE

We have a huge choice of handles, knobs, knockers and letterplates to choose from. Our partnership with Samuel Heath allows us to offer the finest in English made architectural ironmongery that comes with guarantees up to 25 years.

## 8 COMPLETE PACKAGE

We're replacement specialists. Our service includes a detailed survey, full installation by our employed craftsmen, and all associated finishing work, inside and out.

## 9 GUARANTEED

As with all of our products, your door is protected by comprehensive guarantees. We cover the timber for 30 years against rot and insect decay. Double glazing, hardware and installation work is covered for 10 years. Paint finishes have an 12-year guarantee against the need for redecoration. All of our warranties are backed up by an insurance policy which also covers your deposit during manufacture.

## 10 THERMAL EFFICIENCY

A huge amount of technology goes into every door to provide ultimate thermal efficiency. Double weather strips around the entire frame, advanced heat reflective double glazing, thermally broken raised and fielded panels, not to mention our weather rated letterboxes and thresholds.
